COMPETENCES

- Expertise IA & LLM
- Python, LangChain, LangGraph, MLOps
- Bon relationnel et bonne communication
- Result driven & résilient

COMPETENCES TRANSVERSALES

[Joueur de poker](#) (compétitif)

CERTIFICATIONS

[AWS \(2025\)](#) - [Generative AI](#) with LLM

[IBM \(2025\)](#) - [Agentic AI](#) with LangChain and LangGraph

[Artefact school \(2025\)](#)-
[Bootcamp](#) Data Engineering

EDUCATION

BOSTON UNIVERSITY (USA)
2016
Master of Science in Computer Information System (BI & AI)

HERIOTT WATT UNIVERSITY
2014
Bachelor of Science

PROFIL

AI specialist avec une solide expérience en IA, alliant **expertise technique** et **excellentes compétences relationnelles**. Doté d'un **esprit d'équipe proactif et autonome**, je sais créer des liens de confiance avec les parties prenantes et traduire les besoins métiers en solutions techniques concrètes, pour un **impact stratégique et mesurable**.

EXPERIENCES

Strigloo dec 2018 - Present
Entrepreneur

J'ai fondé Strigloo en tant que **consultant indépendant en data science**, avant de le transformer, depuis octobre 2024, en une entreprise AgriTech **dédiée à renforcer la souveraineté alimentaire européenne face à la transition climatique**.

Projets phare en IA générative :

- **Application modulaire d'analyse technique**: Ingestion, détection d'anomalies et recommandations automatisées via LLM (LangChain, MLflow, Python, Streamlit)
- **Moteur de recommandation produit**: Suggestions personnalisées et explicables en temps réel (LangChain, Airflow, MLflow, Streamlit)
- **Outil digital relationnel assisté par LLM**: Amélioration de la communication client grâce à l'IA générative

Databricks nov 2022 - oct 2024
Account Manager

Account Manager gérant un portefeuille clients, accompagnant les entreprises dans leur **stratégie data** et l'adoption de Databricks à travers des **cas d'usages** en **IA et AI Gen**, pour générer un **impact business mesurable**.

- Analyse les **besoins métiers** et **conception** des solutions sur mesure.
- **Collaboration** étroite entre les équipes techniques et métiers pour garantir une intégration fluide et un déploiement rapide des solutions.
- Exploitation de la **connaissance business clients** pour proposer **proactivement** les fonctionnalités et **cas d'usages pertinents**, en veillant à ce que la plateforme réponde à leurs enjeux critiques et génère un impact business.

Cette expérience a renforcé ma capacité à **faire le lien entre la technologie, la valeur métier et l'engagement client**, en livrant des solutions data end-to-end qui créent un impact mesurable.

Datarobot sept 2021 - nov 2022
Pre-sales/Post-sales Data scientist

Pre-Sales/Post-sales Data Scientist, j'accompagne les clients à transformer leurs données en impact business mesurable, des phases d'idéations jusqu'au déploiement.

- Accompagnement des clients tout au long du cycle de vie des modèles IA/ML—de la qualification des défis au déploiement et à la mesure du ROI—en alignant les projets avec leur stratégie métier.
- Conception des cas d'usage IA à fort impact et guidé l'adoption de DataRobot pour résoudre des problèmes complexes en data science et livrer des résultats métiers mesurables.

Symphony Retail AI oct 2017 - jun 2021
Senior Data Scientist nov 2019 - jun 2021
Data Scientist oct 2017 - nov 2019

Conception et implémentation de la solution Demand Forecast AI (DFAI) depuis sa genèse. J'ai développé des **modèles prédictifs avancés** en IA/ML, construit des **pipelines de données exogènes** (météo, événements, périodes clés), et optimisé des algorithmes pour le **clustering de magasins**, l'analyse de l'**impact météo** et la **détection d'attrition client** (3^e place lors d'un hackathon). Cette solution a permis d'améliorer significativement la précision des prévisions de demande en retail, en intégrant des variables contextuelles et en automatisant des insights actionnables.

REFERENCES

Vincent Bilbeissi

(while at Databricks)

Chief Data Officer - Vusion Group

It's been a true pleasure working with Eric, and I can confidently say anyone who has the chance to collaborate with him is lucky. Eric has the ability to listen and adapt to the needs of those around him. Whether it's clients or community members, he takes the time to truly understand different perspectives and respond with thoughtful solutions.

His ability to connect with people fosters an environment of trust and collaboration, that was key to facilitate our partnership with Databricks.

His approach to building relationships is intentional and supportive, and it's clear he values long-term, mutually beneficial collaborations.

Most importantly, Eric is incredibly reliable. When he commits to something, you can count on him to follow through with excellence and consistency.

Thierry Clua

(while at Databricks)

Architecture Group Director - Elior Group

I am delighted to recommend Eric for their exceptional assistance with Databricks and their insightful approach to user story-driven data exploitation. Eric demonstrated an impressive depth of knowledge and a keen ability to translate complex data concepts into actionable insights. Their clear vision and strategic thinking significantly enhanced our project's outcomes.

Moreover, Eric's focus on user stories ensured that our data strategies were always aligned with our business goals. Their collaborative spirit and dedication to excellence made them an indispensable part of our team. I highly recommend Eric for any role that requires a blend of technical prowess and strategic insight. Additionally, he is a very pleasant and constructive person to work with, always bringing a positive and supportive attitude to the table.

Majdi SAADANI

(while at Databricks)

Data project manager - Alchimie

I had the pleasure of working with Eric, and I can only praise his professionalism and efficiency.

His sense of service, his ability to propose innovative solutions, and his responsiveness greatly contributed to the success of our data projects. I highly recommend him.

Fabien Karquel

(while at Databricks)

Lead dev - Enginn Technologies

Eric helped us migrate and optimize our AI solutions.

Thanks to his insightful recommendations, we were able to cut our infrastructure costs in half!

In addition to his invaluable assistance, Eric is a very pleasant person to work with. We would be delighted to collaborate with him again on future projects.

Amadou Thioune

(while at Databricks)

Senior Data Engineer - LaCollection.io

I have had the opportunity to work with Eric on several complex projects related to Databricks, and it has been a real pleasure!

Eric is always attentive and knows how to make complex issues accessible to all stakeholders in order to bring real value to the table.

Vattana CHHAY

(while at Datarobot)

Responsible projects Data & CRM - Fitness Park

Eric is the kind of person who puts you at ease. Thanks to his technical skills and understanding of the business, the use cases discussed are pleasantly challenging, making them relevant and, in hindsight, fascinating.
